About Me

As a third-year student at the University of Toronto St. George Campus, I am taking Computer Science Specialist and Statistics Minor. And in my third year studying, I choose AI and Computer Vision to be my focus. In the past two years, I have learned and mastered multiple computer languages like Python, Java, SQL and C and had a strong ability for algorithmic. I also developed an Android App with a team. Furthermore, in a course named CSC301, I am doing a new project which also develops a web app which we need to use React Native and Flutter for real customer demand with my teammates. And in our other three assignments, we create a prototype web app using Python Flask and Docker, and deployed to the web using Heroku.

Skills

1. Skilled in using Python, Java , C, PHP and SQL
2. Good experience in developing web and software
3. Strong experience in UI design
4. Complete comfort with git
5. Strong ability for coding and self-learning
6. Very strong ability for team work and problem solving
5. Good verbal and written communication skills.

Work Experience

Database website development, PICC(The People's Insurance Company (Group) of China Limited), Zhengzhou, China — 2019.05 - 2019.08

I had three and a half months of internship in PICC this summer. In this period, I designed and implemented two data query websites through self-learning PHP , Javascript and SQL. Then these two websites were operated successful and applied to daily work, with helping from my teammates.

Education

Third-Year Computer Science student at University of Toronto St George Campus
